

Dear Dr. Henderson,

First I would like to thank God for sending one of His angels from Heaven to help those who can only be helped by such a special person. Second, I want to thank you for your skill and expertise in removing my Tarlov cyst and tethered spine. You have relieved me of such awful pain. I have been to many doctors and pain centers, through different procedures and treatments that were supposed to relieve the pressure and pain in my lower back, but were unsuccessful.

After you performed my surgery, I am gradually getting my life back. I pray the Lord will bless you continually for there are many others that can only be helped by you. There are no words that can express my thanks and gratitude. You are truly a Godsend.

Toni
